**Privileged Access
Management (PAM)**

Secure, streamline, and scale your access management

In our complex digital landscape, organizations face unprecedented challenges in managing privileged access, securing sensitive data, and maintaining operational efficiency.

Devolutions addresses these challenges head-on by providing a comprehensive solution that combines robust security with seamless usability. Their platform empowers IT teams to take control of their security infrastructure while reducing operational overhead and maintaining compliance. Whether managing remote access, protecting privileged credentials, or monitoring security risks, Devolutions delivers the tools and visibility needed to protect organizations' most valuable assets.

Key Features

Smart Vault Control

Advanced enterprise-grade vaulting with granular role-based access controls and permissions.

Flexible Access Workflow

Streamlined mobile-first checkout system with multilevel approvals and delegation options.

Universal Discovery Engine

Comprehensive discovery of accounts across any API-enabled system with unique AnyIdentity technology.

Zero-Client Session Control

Secure browser-based privileged access with full session monitoring, recording, and granular control capabilities.

Adaptive Password Security

Intelligent automatic password rotation after use or on schedule, with no manual intervention.

Real-Time Risk Analytics

Continuous monitoring and analysis of privileged access patterns to detect potential threats.

Devolutions ranks among top performers in customer loyalty metrics

Peer review platform SoftwareReviews.com recognizes Devolutions as a 2025 Emotional Footprint Champion in the Privileged Access Management category.

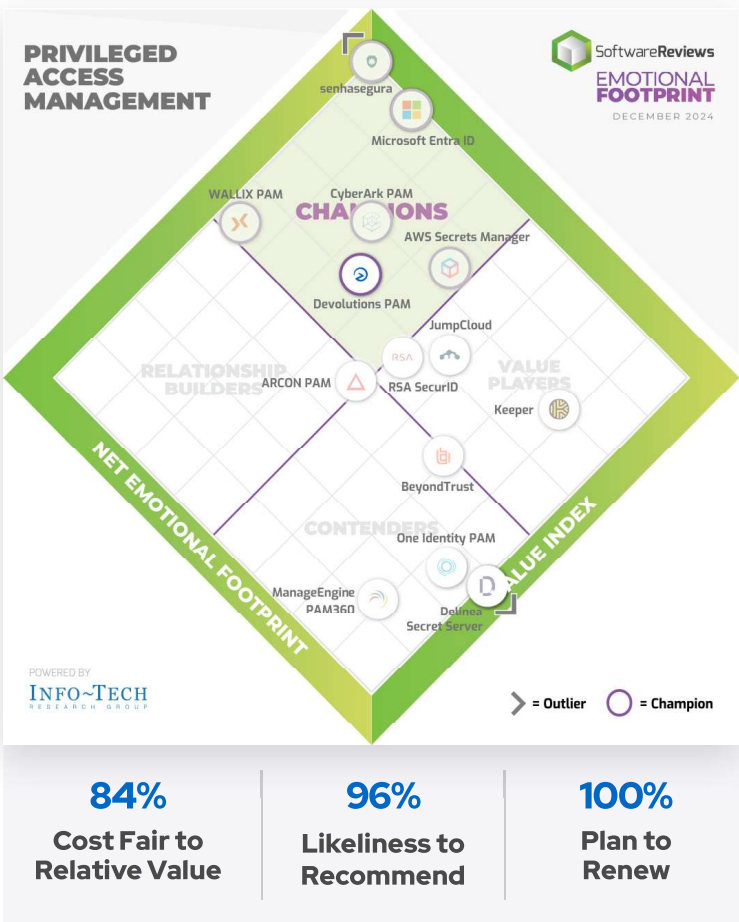

What is the Emotional Footprint?

SoftwareReviews evaluates 27 aspects of the customer relationship using a net promoter methodology. These ratings include provocative, detailed questions on the experience of working with the vendor, creating a powerful indicator of overall user sentiment.

Category-leading customer satisfaction

Devolutions customers provide overwhelmingly positive reviews, rating a **+100 Net Emotional Footprint**.

+100
Net Emotional Footprint

Champion performance

The SoftwareReviews Diamond highlights which technology providers deliver a high-value customer experience.

According to SoftwareReviews data, **Devolutions ranks among the top 3 vendors in their category** for customer loyalty metrics. The solution achieved leading positions with a 96% likelihood to recommend rating, a perfect 100% plan to renew rate, and 84% of customers confirming the cost represents fair value for the capabilities delivered.

Devolutions PAM earns prestigious Gold Medal as 2025 Data Quadrant Champion

Devolutions has garnered significant recognition, earning a Gold Medal from SoftwareReviews as a 2025 Data Quadrant Champion in the Privileged Access Management (PAM) category.

What is the Data Quadrant? SoftwareReviews evaluates aspects of software capabilities and features using a weighted average of user satisfaction scores. These ratings use a satisfaction scale to determine whether software delights or disappoints, creating a powerful indicator of overall user value.

Devolutions excelled in its category, achieving the top overall ranking in PAM with an impressive **composite score of 8.5**. This accolade is a testament to its robust feature set and commitment to addressing the needs of its users.

"Devolutions on a dollar for feature/functional capability is not matched by any other PAM solution I have seen or looked at for adoption."

Technology Consultant

Maximize enterprise security while accelerating workflow efficiency

Devolutions delivers a comprehensive privileged access management framework that enables organizations to implement robust security protocols while maintaining operational agility. The solution streamlines credential management workflows through centralized authentication mechanisms, effectively reducing administrative overhead and accelerating user productivity.

With industry-leading scores in **productivity enablement, performance enhancement, innovation support, security protection, and reliability (100% across all metrics)**, the platform demonstrates exceptional operational excellence.

Ease of Data Integration

Usability and Intuitiveness

Strategy & Innovation	Devolutions	CyberArk PAM	BeyondTrust	Keeper	Delinea Secret Server
Enables Productivity	100%	92%	86%	90%	88%
Performance Enhancing	100%	96%	79%	90%	94%
Helps Innovate	100%	96%	79%	80%	72%
Security Protects	100%	93%	93%	100%	94%
Reliable	100%	100%	93%	100%	88%
Average	100%	95%	86%	92%	87%

Role-based access controls and automated credential rotation establish a zero trust security posture without compromising operational efficiency. The platform’s architecture ensures that privileged credentials remain protected while enabling seamless access for authorized users, ultimately creating a balanced approach to security and productivity optimization.

Surpassing industry standards with remarkable scores in **IT administration (94%), data integration (89%), customization capabilities (88%), and user experience (87%)**, Devolutions stands as a testament to superior enterprise-grade privileged access management.

Ease of Customization

Ease of IT Administration

Maximize enterprise security while accelerating workflow efficiency

Devolutions demonstrates strong performance across key features, achieving a score of **79%** in **compliance reporting** and impressive ratings in critical areas, with **95%** in **access control** and **89%** in **password vaulting**. When compared to industry leaders, Devolutions maintains a competitive position in the market, particularly in core PAM functionalities.

Looking at other features, Devolutions excels with an **85%** rating in **privileged account lifecycle management** and **89%** in **privileged password management**. This performance indicates Devolutions’ commitment to providing comprehensive PAM solutions that meet industry standards while maintaining competitive pricing and accessibility.

Average	100%	93%	83%	90%	70%

The exceptional **vendor support framework (97%)** ensures that technical challenges are resolved promptly and effectively, while comprehensive **training resources (99%)** enable teams to maximize platform capabilities.

This dedication to service excellence extends beyond traditional support models, creating an ecosystem where clients receive proactive assistance, strategic guidance, and continuous value enhancement. The company’s customer-first philosophy manifests in every interaction, from initial implementation through ongoing operations, ensuring organizations achieve optimal results from their privileged access management investment.

Vendor Support

Availability and Quality of Training

Implement best-in-class security features for modern enterprises

Devolutions consistently demonstrates technical leadership through its comprehensive feature set and commitment to innovation.

The platform excels across multiple critical metrics, achieving **perfect scores in unique capabilities, continuous improvement processes, product enhancement initiatives, and inspiring technological advancement**. Their holistic approach ensures that the solution evolves alongside emerging threats and changing business needs while maintaining its position as an industry pioneer in security management innovation.

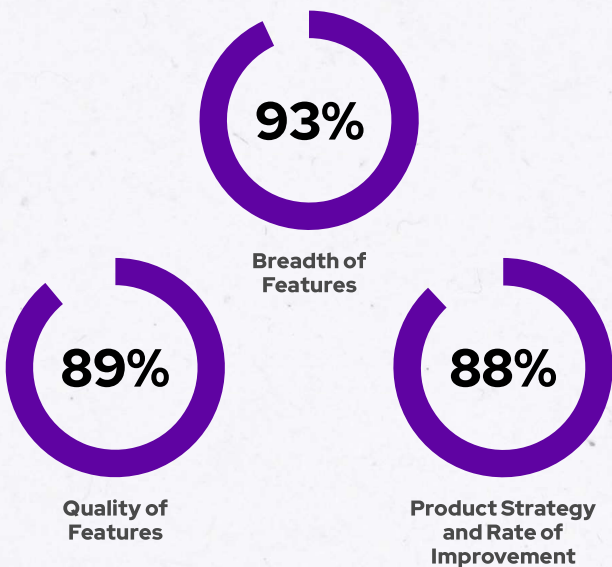

“They roll out new features and improvements on a pace beyond any competitors.”

Business-critical success and customer excellence

Devolutions achieving a **100% score** on the **Critical metric** demonstrates how its solutions have become indispensable to businesses. The platform serves as a mission-critical component for organizations, providing secure remote access, privileged credential management, and compliance maintenance.

From small businesses to enterprises, organizations rely on Devolutions' robust platform to protect assets and streamline operations, making it an indispensable part of their IT infrastructure. The platform's security features and seamless integration capabilities have made it a fundamental component that businesses surveyed cannot operate without.

Devolutions' **perfect Love score** demonstrates the exceptional trust and satisfaction users have in their solutions. With outstanding support, strong community engagement, and high adoption rates, customers view Devolutions as an essential business partner rather than just a service provider. This excellence has transformed Devolutions from a simple tool into a vital part of their customers' business infrastructure, driving continuous innovation and development.

What is privileged access management (PAM) software?

Privileged access management (PAM) combines tools and technology to secure, control, and monitor access to an organization's critical information and resources.

Subcategories of PAM include shared access password management, privileged session management, vendor privileged access management, and application access management.

"Devolutions presents a compelling alternative within the PAM market. Their dedication to security, robust integrations, and user-centric approach offers a strong foundation for their growth potential. As the PAM landscape continues to evolve, Devolutions' commitment to innovation and customer focus positions them well to become a key player in securing privileged access for organizations of all sizes."

Carlos Rivera, Principal Advisory Director at Info-Tech Research Group¹

Devolutions Solutions

Workforce Password Management

Improve your security strategy without reducing productivity by using a password management solution.

Manage Credentials

Securely store and share workforce passwords.

Enforce Security

Implement authentication policies and MFA enforcement.

Streamline Access

Reduce password fatigue with SSO and cross-platform support.

Remote Access Management

Establish a secure entry point for internal or external segmented networks that require authorized just-in-time (JIT) access.

Grant Temporary Access

Tightly control access for external users and vendors.

Replace VPNs With a Lightweight Alternative

Provide a protocol-limited connection to a remote network segment.

Monitor Sessions

Enforce MFA and track remote access activity.

Remote Connection Management

Managing a wide range of remote connections and tools from a centralized platform can boost productivity, decrease cost, and increase security.

Centralize Remote Access

Manage all IT connections in one platform.

Secure Infrastructure

Enforce access policies for IT environments.

Improve IT efficiency

Standardize workflows for sysadmins and helpdesks.

Privileged Access Management

Diminish the risk of insider threats and cyberattacks while providing audit and compliance requirements for your team.

Control Privilege Access

Secure and manage high-risk accounts.

Enforce Least Privilege

Restrict access to critical resources.

Strengthen Security

Rotate passwords and monitor privileged activities.

About SoftwareReviews

SoftwareReviews is a division of Info-Tech Research Group, a world-class IT research and analyst firm established in 1997. Backed by two decades of IT research and advisory experience, SoftwareReviews is a leading source of expertise and insight into the enterprise software landscape and client-vendor relationship.

By collecting data from real IT and business professionals, the SoftwareReviews methodology produces the most detailed and authentic insights into the experience of evaluating and purchasing enterprise software.

Data quality is paramount. That's why SoftwareReviews bends over backward to ensure the data collected is from experienced users, so you can trust it and make decisions with confidence. Every review is thoroughly checked for authenticity through a robust Q&A process. Dynamic reviews adapt according to the reviewer's role and experience, avoiding inaccurate guesses.

Privileged access management (PAM) coverage

SoftwareReviews covers privileged access management (PAM) vendors and has published detailed user-generated reviews on 15 key products being used by organizations in both private and public sectors.

These reviews look at key metrics in capability and feature importance and satisfaction as well as the user experience and trust with the suppliers of these products.

Data from this report is sourced from the December 2024 Privileged Access Management (PAM) Emotional Footprint and the June 2025 Data Quadrant Awards.

SoftwareReviews Emotional Footprint methodology

SoftwareReviews collects user insights that help organizations more effectively choose software that meets their needs, measure business value, and improve selection.

Data and insights shown in this report were gathered from 327 validated users from the Privileged Access Management category.

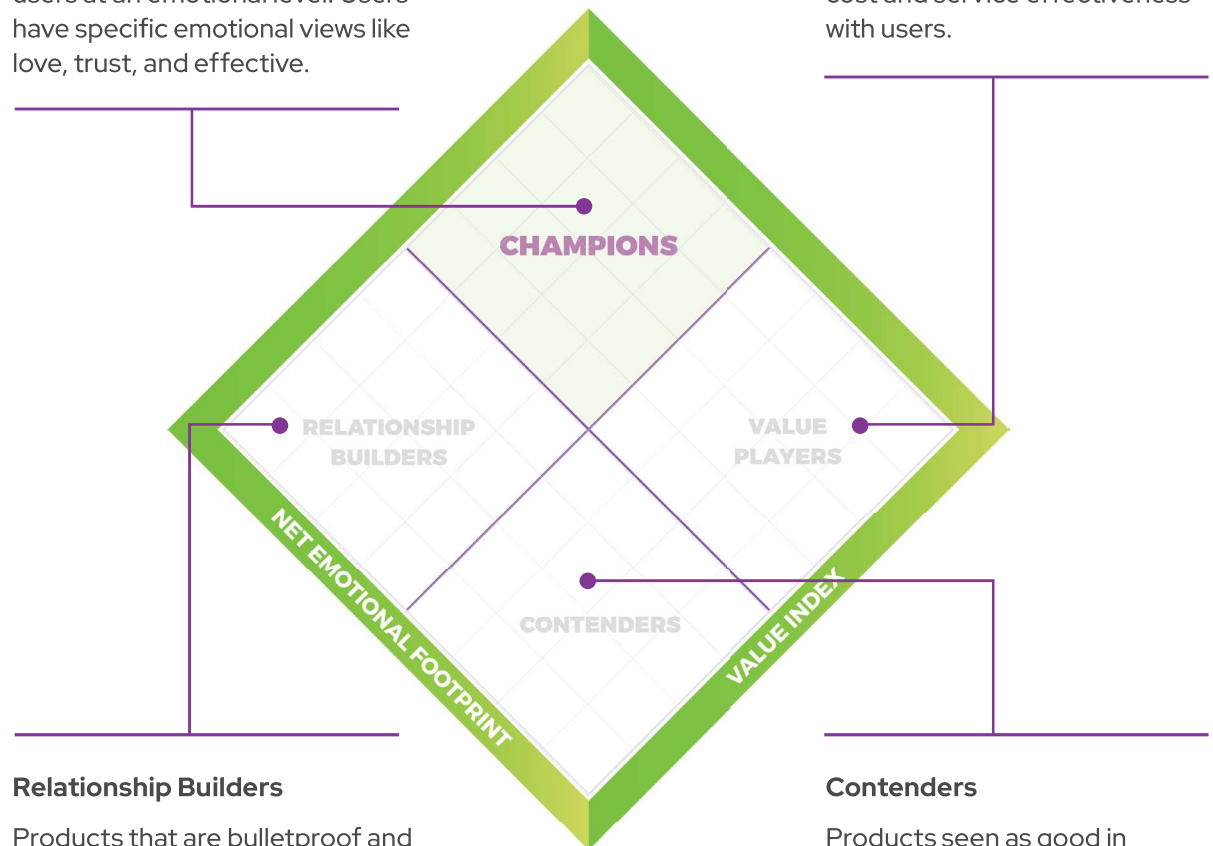

Rankings, results, and positioning on SoftwareReviews reports is based entirely on end-user feedback solicited from a proprietary online survey engine.

Champions

Products that resonate highly with users at an emotional level. Users have specific emotional views like love, trust, and effective.

Value Players

Products that succeed on cost and service effectiveness with users.

Relationship Builders

Products that are bulletproof and focus on fulfilling the core needs with steady support, not the latest feature.

Contenders

Products seen as good in some areas and trailing in others. Users look to these for innovation at the edge but aren't committed fully.

SoftwareReviews Data Quadrant methodology

SoftwareReviews collects user insights that help organizations more effectively choose software that meets their needs, measure business value, and improve selection.

Data and insights shown in this report were gathered from 332 validated users from the Privileged Access Management category.

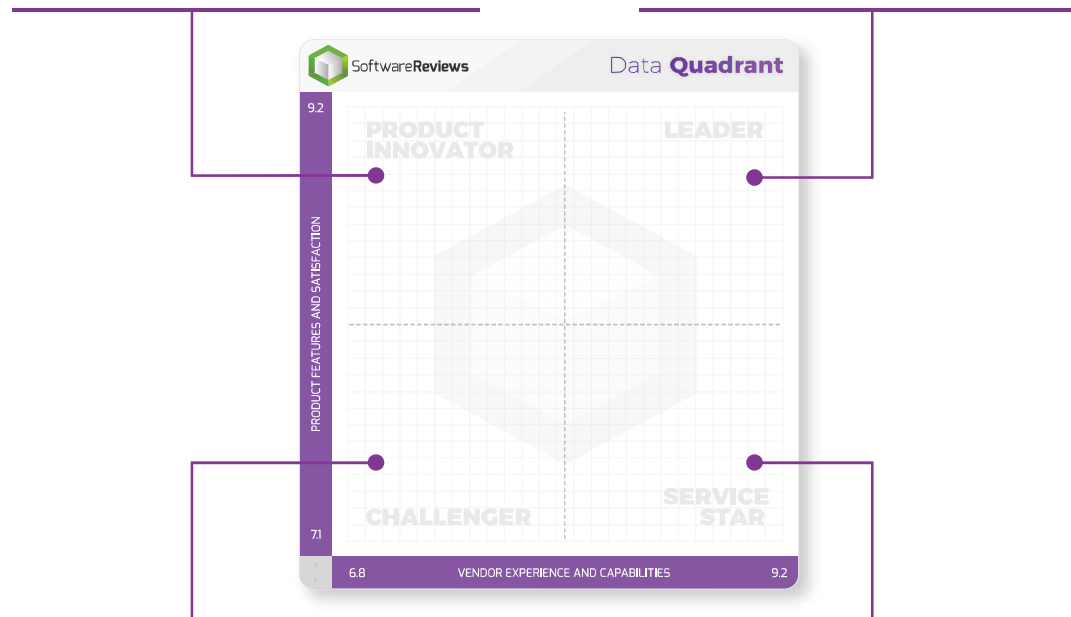

Rankings, results, and positioning on SoftwareReviews reports is based entirely on end-user feedback solicited from a proprietary online survey engine.

Product Innovators

Products that emphasize product features, gaining strong recommendations from their customers.

Leaders

Products that resonate strongest in the market, balancing features with a great user experience.

Challengers

Products that are strong performers in some areas and trail in others. Often up-and-coming vendors.

Service Stars

Products that emphasize a good experience and build strong relationships with customers.
